

PRODUCT DATA

1004 Prep Wash

DESCRIPTION:

Prep Wash is a unique waterborne cleaner/adhesion aid developed specifically for use on plastic parts prior to priming, painting or filling.

USE:

Prep Wash is used to clean plastic parts, prior to adhesion promoter and primer application, for optimum primer repair performance.

APPLICATION:

1. Shake well before using. Remember to remove plastic insert on quart before using.
2. Apply full strength on surface to be primed, painted or repaired using a clean cloth, sponge, or brush. Keep surface wet for two minutes. On a repair, use Prep Wash and a scuff pad to enhance the performance of your filler.
3. Rinse with water, then wipe dry with lint free towel.
4. Surface must be treated with Plasto-Mend TPO Adhesion Promoter #1023-F or Mul-TIE Adhesion Promoter #1031/1033/1034 and be primed within four hours of applying Prep Wash #1004.

SALES POINTS:

- Eliminates need for sanding of replacement polyurethane parts.
- Provides outstanding adhesion of primer, paint and repair filler on polyurethane parts.
- Specifically designed to clean today's plastics.
- Improves overall repair when used with the Bond-Tec® System.
