Aluminum Bonding Prep

DESCRIPTION:

Transtar's Aluminum Bonding Prep is used specifically with Transtar's 60 minute Structural & Metal Bonding Adhesive Material #1142. This is an excellent product for preparing aluminum substrates for bonding.

TECHNICAL DATA:

APPEARANCE: Green Liquid
PACKAGE V.O.C.: 0.00#/gal

APPLICATION:

1. Remove oil, grease or dirt with GP Solvent #4074 or Acry Solvent #9873/9874.
2. Apply Aluminum Bonding Prep (spray bottle, roller, pressure sprayer or paint brush) to aluminum substrate to be bonded. Clean applicator after use.
4. Allow a minimum of 1 hour for conversion to occur.
5. Rinse thoroughly with water and wipe dry with a clean cloth to remove any remaining residue. (Do not use solvents)

SALES POINTS:

- Etches steel & aluminum
- Stops further corrosion
- Improves adhesion of bonding material to aluminum substrates
- Easy to apply, ready to use spray container
- For automotive and industrial applications

(Refer to Material Safety Data Sheet for proper handling of products listed in this bulletin.)

PACKAGE SIZE:

#1154 Aluminum Bonding Prep, Quart, 6/case
