

PRODUCT DATA

Cool & Mid Temperature Basecoat Stabilizers

DESCRIPTION:

Transtar Basecoat Stabilizers have been formulated as comparable offerings to the major manufacturer's products. Since these are similar products, they are intended for use in a comparable manner (1 for 1 by volume), as the color formula indicates. Transtar products have been developed to provide similar physical properties of their competitors' including viscosity, solids, weight per gallon, and basecoat compatibility.

Transtar 9600 Series Basecoat Stabilizers are comparable to Sherwin Williams® BSC Series (primarily used in ULTRA 7000® basecoat and Martin Senour® TRS Series). This product is intended for use in a similar manner as the Sherwin Williams and Martin Senour products.

TECHNICAL DATA:

9600-1S	Cool:	55° - 65°F	(13° - 18°C)
9605-1S	Mid:	65° - 75°F	(18° - 24°C)

DIRECTIONS:

Shake well before using. Mix 1 part basecoat color with 1 part of Basecoat Stabilizer (9600-1S, 9605-1S) appropriate for shop temperature. Apply product and follow manufacturers recommendations for basecoat flash time before applying clearcoat.

**DISCLAIMER: Sherwin Williams Automotive Finishes, Inc. and Martin Senour do not manufacture, endorse, or guarantee Transtar products.*

CLEANUP:

Rinse and wash all spray equipment with wash solvent (check V.O.C. regulations in your area). Be sure to brush clean all movable parts and orifices/openings.

SALES POINTS:

- For use with Sherwin Williams* ULTRA 7000® Basecoat and Martin Senour* TecBase
- Improves appearance of basecoats
- Assists in blending of color
- For use in a variety of temperatures and climatic conditions
- Initiates improved cure and faster flash time of basecoat
