Section 1 - Product and Company Identification

Product Name: UNIVERSAL PRIMER BLACK    Product Code: 6021, 6024, 6029
Manufacturer/Supplier: TRANSTAR AUTOBODY TECHNOLOGIES
2040 Heiserman Dr.
Brighton, MI, 48114, USA

24 Hour Emergency Phone(s):
USA 800-424-9300 (CHEMTREC)
International +1 703 527 3887 (CHEMTREC Int'l)

Product Use: Primer. For Professional and Industrial Use Only
Not recommended for: Not for Sale to General Public

Section 2 - Hazards Identification

Classification of the substance or mixture

GHS Ratings:

- Flammable liquid 2 Flash point < 23°C and initial boiling point > 35°C (95°F)
- Skin corrosive 2 Reversible adverse effects in dermal tissue, Draize score: >= 2.3 < 4.0 or persistent inflammation
- Eye corrosive 2A Eye irritant: Subcategory 2A, Reversible in 21 days
- Skin sensitizer 1 Skin sensitizer
- Carcinogen 1A Known Human Carcinogen Based on human evidence
- Reproductive toxin 1A Based on human evidence
- Organ toxin single exposure 1 Significant toxicity in humans- Reliable, good quality human case studies or epidemiological studies, Presumed significant toxicity in humans- Animal studies with significant and/or severe toxic effects relevant to humans at generally low exposure (guidan)
- Organ toxin repeated exposure 1 Significant toxicity in humans; Reliable, good quality human case studies or epidemiological studies Presumed significant toxicity in humans- Animal studies with significant and/or severe toxic effects relevant to humans at generally low exposure
- Aspiration hazard 1 Aspiration Toxicity Category 1: Known (regarded)- human evidence - hydrocarbons with kinematic viscosity ≥ 20.5 mm2/s at 40°C.

GHS Hazards

**Section 4 - First Aid Measures**

**INHALATION:** If inhaled: Remove person to fresh air and keep comfortable for breathing. If breathing difficulty persists, seek medical attention.

**EYE CONTACT:** Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for a minimum of 15 minutes while holding eye lids open. If eye irritation persists: seek medical attention.

**SKIN CONTACT:** Take off all contaminated clothing immediately. Wash exposed area thoroughly with soap and water. Seek medical attention if irritation persists. Do NOT use solvents or thinners to wash off.

**INGESTION:** If swallowed, seek medical attention immediately and have product container or label at hand. DO NOT INDUCE VOMITING unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.

**Most important symptoms and effects, both acute and delayed:**

**Potential acute health effects:**

**Eye contact:** Causes serious eye irritation.

**Inhalation:** Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

**Skin contact:** Causes skin irritation. May cause an allergic skin reaction.

**Ingestion:** Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways. Irritating to mouth, throat and stomach.

**Over-exposure signs/symptoms:**

**Eye contact:** Adverse symptoms may include the following:

Pain or irritation, watering, redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation, coughing, nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness.

**Skin contact:** Adverse symptoms may include the following:

Irritation, redness. May cause an allergic skin reaction.

**Ingestion:** Adverse symptoms may include the following:

Nausea or vomiting.

**Indication of any immediate medical attention and special treatment needed.**

Seek professional medical attention for all over-exposures and/or persistent problems.

In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Specific treatments:** No specific treatment.

**Protection of first-aiders:** No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

**Section 5 - Fire Fighting Measures**

**LEL:** 1.0 %  
**UEL:** 36.0 %

**Extinguishing Media:** Dry Chemical, Foam, CO2 or water fog.
**Unsuitable Extinguishing Media:** High volume water jets

**Unusual Fire and Explosion Hazards:** Vapors can travel to a source of ignition and flash back. Closed containers may explode when exposed to extreme heat or burst when contaminated with water (CO2 gas evolved). Hazards apply to empty containers. Combustion generates toxic fumes.

**Hazardous Combustion Products:** oxides of carbon, oxides of nitrogen, formaldehyde, toxic fume

**Special Firefighting Procedures:** Highly toxic fumes may be generated by thermal decomposition. Water runoff from firefighting can cause environmental damage. Dike and collect water used to fight fire.

**Fire Equipment:** Full fire fighter equipment including SCBA should be worn to avoid skin contact and inhalation of concentrated vapors. Minimize skin exposure.

---

# Section 6 - Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures:**
Use personal protective equipment. Avoid breathing vapors and mist. Ensure adequate ventilation. Eliminate all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulation to form explosive concentrations. Vapors can accumulate in low areas.

For personal protection see section 8.

**Environmental precautions:**
Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

**Methods and materials for containment and cleaning up:**

**Small Spills:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large Spills:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

---

# Section 7 - Handling and Storage

**Safe Handling Measures:** Persons with history of skin sensitization problems should not be employed around any process in which this mixture is being used. Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Ground and bond container and receiving equipment. Use non-sparking tools and explosion proof equipment when handling this material. Keep away from sources of ignition - No Smoking. Use in cool, well-ventilated areas. Keep containers closed when not in use. Take measures to prevent the build up of electrostatic charge. Follow all SDS and label precautions even after container is emptied because they may retain product residues. For precautions see section 2.

**General Occupational Hygiene:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Storage Requirements:** Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces- No Smoking. Store in a cool, dry and well-ventilated place. Do not reuse container when empty.

</table>

**Engineering Controls**: Ground and bond container and recieving equipment. Use explosion proof electrical, ventilation, lighting and motorized equipment. Use non-sparking tools. Ensure adequate ventilation.

**Ventilation**: General mechanical ventilation or local exhaust should be utilized to keep vapor concentrations below exposure limits (PEL & TLV). Ventilation equipment must be explosion proof.

**Safe Work Practices**: Eye washes and safety showers in the workplace are recommended. Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands thoroughly after using and before eating, drinking or smoking.
Employee education and training in the safe use and handling of this product is required under the OSHA Hazard Communication Standard 29CFR1200. Smoking in area where this material is used should be strictly prohibited. Always use protective clothing and equipment. Remove all contaminated clothing and wash thoroughly when finished working. Keep food and drink away from material and from area where material is being used. Spraying of material can cause and oxygen deficient environment. Use proper ventilation to remove vapors, mist and fumes combined with NIOSH approved respirator.

**Respiratory Protection:** When working with this material use a MSHA/NIOSH approved cartridge respirator or suitable respiratory protection to keep airborne mists and vapor concentrations below the PEL & TLV limits. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus.

**Eye/Face Protection:** Use safety glasses with chemical splash goggles or faceshield.

**Skin Protection:** Use chemical resistant gloves.

**Body Protection:** Impervious clothing, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

**Contaminated Gear/Hygiene Practices:** Remove all contaminated clothing and wash thoroughly when finished working. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Keep food and drink away from materials and from area where material is being used or stored.

### Section 9 - Physical and Chemical Properties

### Section 10 - Stability and Reactivity

**Reactivity:** No data available

**Stability:** Stable under recommended storage conditions.

**Possibility of hazardous reactions:** Vapors may form explosive mixture with air. Hazardous polymerization will not occur.
Conditions to avoid: Heat, flame and sparks. Extreme temperature and direct sunlight.

Incompatible with:
- Alkali contamination
- Strong oxidizing agents, acids, and alkali/base/caustic solutions

Hazardous products produced under decomposition:
- Carbon Monoxide, Carbon Dioxide

Section 11 - Toxicological Information

Mixture Toxicity
- Oral Toxicity: 2,551mg/kg
- Inhalation Toxicity: 57mg/L

Component Toxicity
- Toluene
  - Oral: 2,600 mg/kg (Rat)
  - Inhalation: 13 mg/L (Rat)
- Methyl Isobutyl Ketone
  - Oral: 2,080 mg/kg (Rat)
  - Dermal: 3,000 mg/kg (Rabbit)
  - Inhalation: 2,830 ppm (Rat)
- Isopropyl Alcohol
  - Oral: 1,870 mg/kg (Rat)
  - Dermal: 4,059 mg/kg (Rabbit)
- Xylene
  - Oral: 3,500 mg/kg (Rat)
  - Dermal: 4,350 mg/kg (Rabbit)
  - Inhalation: 29 mg/L (Rat)
- n-Butyl Acetate
  - Inhalation: 29 mg/L (Rat)
- Ethylbenzene
  - Oral: 3,500 mg/kg (Rat)
  - Inhalation: 17 mg/L (Rat)

This mixture has not been tested for toxicological effects.

Acute Effects:
- INHALATION - Dizziness, breathing difficulty, headaches, & loss of coordination.
- EYE CONTACT - Moderate irritation, tearing, redness, and blurred vision.
- SKIN CONTACT - Moderate irritant. Can dry and defat skin causing cracks, irritation, and dermatitis.
- INGESTION - Can cause gastrointestinal irritation, vomiting, nausea, & diarrhea.

Chronic Effects:
May affect liver, kidney and central nervous system with repeated exposure. Prolonged or repeated exposure may cause lung injury. May cause an allergic skin reaction.

Routes of Entry
- Inhalation
- Skin Contact
- Eye Contact
- Ingestion

Target Organs
- Blood
- Eyes
- Kidneys
- Liver
- Lungs
- Central Nervous System
- Reproductive System
- Cardiovascular System
- GI Tract
- Respiratory System

Effects of Overexposure
Contact can irritate the skin. Exposure can irritate the eyes and respiratory tract. Exposure to high concentrations can cause dizziness, lightheadedness, and unconsciousness. Methyl isobutyl ketone can affect you when breathed in. Exposure to high concentrations can cause you to feel dizzy and lightheaded and to pass out. Breathing the vapor may cause loss of appetite, nausea, vomiting, and diarrhea. Contact or the vapor can irritate the eyes, nose, mouth, throat. Contact can irritate the skin. Ingestion chemical pneumonitis. Ethyl benzene irritates the eyes, skin, and respiratory tract. Exposure to high concentrations can cause dizziness, lightheadedness and unconsciousness. Very high exposures (above the OEL) can cause difficult breathing, narcosis, coma, and even death. Swallowing the liquid may cause aspiration into the lungs, resulting in chemical pneumonitis. May affect the central nervous system. Concentration of 200 ppm can cause irritation. Irritates the eyes and respiratory tract. Causes central nervous system depression. High levels of exposure may cause fatigue, weakness, confusion, euphoria, dizziness, headache; dilated pupils, lacrimation (discharge of tears); nervousness, muscle fatigue, insomnia; paresthesia; cardiac dysrhythmia, unconsciousness and death may occur. Inhalation: 100 ppm exposure can cause dizziness, drowsiness and hallucinations. 100 - 200 ppm can cause depression, 200 - 500 ppm can cause headaches, nausea, loss of appetite, loss of energy, loss of coordination and coma. In addition to the above, death has resulted from exposure to 10,000 ppm for an unknown time. Skin: Can cause dryness and irritation. Absorption may cause or increase the severity of symptoms listed above. Eyes: Can cause irritation at 300 ppm. Ingestion: Can cause a burning sensation in the mouth and stomach, upper abdominal pain, cough, hoarseness, headache, nausea, loss of appetite, loss of energy, loss of coordination and coma. Inhalation: Exposure to vapor can be irritation to the nose and throat. Inhalation of vapor at concentrations above 200 ppm or 3 - 5 minutes can lead to xylene intoxication. Symptoms include headache, dizziness, nausea and vomiting. If exposure should continue, central nervous system depression characterized by shallow breathing and weak pulse can occur. Levels of 230 ppm for 15 minutes may cause lightheadedness without loss of equilibrium. Reversible liver and kidney damage in man has followed exposure to sudden high concentrations of vapor. Such high levels may also give rise to lung congestion. Exposure to extremely high concentrations (10,000 ppm or more) of xylene vapors can lead to a strong narcotic effect with symptoms of slurred speech, stupor fatigue, confusion, unconsciousness, coma, and possible death. The substance irritates the eyes, skin, and respiratory tract. High exposures, above the occupational exposure levels, can cause weakness, headache, and drowsiness and may cause unconsciousness. Irritates the eyes. Inhalation can cause cough, dyspnea (breathing difficulty), wheezing. Inhalation may cause irritation to respiratory tract. Skin contact may cause irritation. Eye contact may cause irritation. Irritates the eyes, skin, and respiratory tract.
Repeated skin exposure can cause dryness and skin cracking. This chemical has not been adequately evaluated to determine whether brain or nerve damage could occur with repeated exposure. However, many solvents and other petroleum-based chemicals have been shown to cause such damage. Effects may include reduced memory and concentration, personality changes (withdrawal, irritability), and fatigue, sleep disturbances, reduced coordination, and/or effects on the nerves to the arms and legs (weakness, "pins and needles"). Long-term exposure may damage the liver and kidneys. Repeated or prolonged contact with skin may cause drying and cracking. Repeated or prolonged exposure to the skin may cause drying, scaling and blistering. May cause kidney disease, liver disease, chronic respiratory disease, skin disease, as follows: EB is not nephrotoxic. Concern is expressed because the kidney is the primary route of excretion of EB and its metabolites. EB is not hepatotoxic. Since EB is metabolized by the liver, concern is expressed for these tissues. Exacerbation of pulmonary pathology might occur following exposure to EB. Individuals with impaired pulmonary function might be at risk. EB is a defatting agent and may cause dermatitis following prolonged exposure. Individuals with preexisting skin problems may be more sensitive to EB. There is limited evidence that EB may damage the developing fetus, and may cause mutations. Repeated or prolonged contact with skin may cause dermatitis; drying, cracking, itching, and skin rash. May cause liver, kidney, and brain damage; decreased learning ability, psychological disorders. Levels below 200 ppm may produce headache, tiredness and nausea. From 200 - 750 ppm symptoms may include insomnia, irritability, dizziness, some loss of memory, cause heart palpitations and loss of coordination. Blood effects and anemia have been reported but are probably due to contamination by benzene. Inhalation of xylene vapor and skin contact with liquid are the two most probable routes of long term exposure. Symptoms of inhalation are dizziness, headache and nausea. Long term exposure has been associated with liver and kidney damage, intestinal tract disturbances and central nervous system depression. Prolonged contact with skin can lead to irritation, dryness and cracking. Repeated exposure can cause poor memory, difficulty in concentration, and other brain effects. It can also cause damage to the eye surface. n-Butyl acetate may cause skin allergy. n-Butyl acetate has been shown to damage the developing fetus in animals. Prolonged and repeated exposure to butyl acetates can cause defatting, drying and cracking of the skin. Although many solvents and petroleum based products cause lung, brain and nerve damage, these chemicals have not been adequately evaluated to determine these effects. Can cause decreased pulmonary function, progressive respiratory symptoms; fibrosis (silicosis). A potential occupational carcinogen. Silicosis is a very serious lung disease and can cause with cough and shortness of breath. Silicosis can develop in a few weeks at very high exposures, or it may occur over many years with lower exposures. Silicosis can cause death. If silicosis develops, risk of developing tuberculosis is increased. The disease may progress with or without continued exposure. If it does, this can be crippling or even fatal. Very fine silica, or "silica flour" is even more hazardous. Exposure to levels well above 3.5 mg/m3 for several months may result in damage to the skin and nails, temporary or permanent damage to the lungs and breathing passages, and adversely affect the heart. Carbon Black containing PAH greater than 0.1% should be considered a suspect carcinogen. Lungs may be affected by repeated or prolonged exposure at very high concentrations: Some Carbon blacks may contain compounds which are carcinogenic and as organic extracts of these have been classified as possibly carcinogenic to humans, special care should be taken to avoid exposure to such extracts. Lung effects remain controversial and may be due to contaminants. It is probable that minor effects reported are non-specific effects associated with exposure to nuisance dusts in general. Polyaromatic hydrocarbons (PAH) are reportedly present in some carbon blacks. Depending on the process of manufacture, there are variations in their chemical compositions. Exposure to low levels may cause many of the symptoms listed above. Skin contact causes dryness and cracking. May cause liver damage. Because methyl alcohol is slowly eliminated from body, repeated low exposures may build-up to high levels causing severe symptoms. Recovery is not always complete. Methanol has been found to be a teratogen (changes in the genetic
material) in animals. Whether it does in humans is unknown.

The following chemicals comprise of at least 0.1% of this mixture and are listed and/or classified as carcinogens or potential carcinogens by the NTP, IARC, OSHA (mandatory listing) or ACGIH (optional listing).

### Section 12 - Ecological Information

This material has not been tested for ecological effects.

**Persistence and degradability:** No data available

**Bioaccumulative potential:** No data available

**Mobility in soil:** No data available

**Other adverse effects:** Contains photochemically reactive solvent.

#### Component Ecotoxicity

**Acetone**

96 Hr LC50 Oncorhynchus mykiss: 4.74 - 6.33 mL/L; 96 Hr LC50 Pimephales promelas: 6210 - 8120 mg/L [static]; 96 Hr LC50 Lepomis macrochirus: 8300 mg/L

48 Hr EC50 Daphnia magna: 10294 - 17704 mg/L [Static]; 48 Hr EC50 Daphnia magna: 12600 - 12700 mg/L

**Talc**

96 Hr LC50 Brachydanio rerio: >100 g/L [semi-static]

**Toluene**

96 Hr LC50 Pimephales promelas: 15.22 - 19.05 mg/L [flow-through] (1 day old); 96 Hr LC50 Pimephales promelas: 12.6 mg/L [static]; 96 Hr LC50 Oncorhynchus mykiss: 5.89 - 7.81 mg/L [flow-through]; 96 Hr LC50 Oncorhynchus mykiss: 14.1 - 17.16 mg/L [static]; 96 Hr LC50 Oncorhynchus mykiss: 5.8 mg/L [semi-static]; 96 Hr LC50 Lepomis macrochirus: 11.0 - 15.0 mg/L [static]; 96 Hr LC50 Oryzias latipes: 54 mg/L [static]; 96 Hr LC50 Poecilia reticulata: 28.2 mg/L [semi-static]; 96 Hr LC50 Poecilia reticulata: 50.87 - 70.34 mg/L [static]

48 Hr EC50 Daphnia magna: 5.46 - 9.83 mg/L [Static]; 48 Hr EC50 Daphnia magna: 11.5 mg/L

96 Hr EC50 Pseudokirchneriella subcapitata: >433 mg/L; 72 Hr EC50 Pseudokirchneriella subcapitata: 12.5 mg/L [static]
Section 13 - Disposal Considerations

Product and container should be disposed of in accordance with all local, regional, national and international regulations. Contact a licensed professional waste disposal service to dispose of this material. Subject to hazardous waste generation, treatment, storage and disposal rules under RCRA, 40CFR261.

Section 14 - Transportation Information

The following transportation information is provided based on Transtar Autobody Technologies interpretation of shipping regulations. Each shipper is responsible for identifying, naming, marking and labeling prior to offering for transport.

Section 15 - Regulatory Information

The information listed in this section is not all inclusive of all regulations for this product or the chemical components of this product.

Australia-AICS: The following chemicals are listed:
- 14808-60-7 Silica, Crystalline 0.1 to 1.0 %
- 100-41-4 Ethylbenzene 0.1 to 1.0 %
- 1333-86-4 Carbon Black 0.1 to 1.0 %
- 67-56-1 Methyl Alcohol 1 to 5 %
- 123-86-4 n-Butyl Acetate 1 to 5 %
- 1330-20-7 Xylene 1 to 5 %
- 67-63-0 Isopropyl Alcohol 1 to 5 %
- 9004-70-0 Nitrocellulose 5 to 10 %
- 108-10-1 Methyl Isobutyl Ketone 10 to 20 %
- 108-88-3 Toluene 10 to 20 %
- 14807-96-6 Talc 10 to 20 %
- 67-64-1 Acetone 20 to 30 %

California Hazardous Substance List:
- None

China-SEPA (IECSC): The following chemicals are listed:
- 14808-60-7 Silica, Crystalline 0.1 to 1.0 %
- 100-41-4 Ethylbenzene 0.1 to 1.0 %
- 1333-86-4 Carbon Black 0.1 to 1.0 %
- 67-56-1 Methyl Alcohol 1 to 5 %
- 123-86-4 n-Butyl Acetate 1 to 5 %
- 1330-20-7 Xylene 1 to 5 %
- 67-63-0 Isopropyl Alcohol 1 to 5 %
- 9004-70-0 Nitrocellulose 5 to 10 %
- 108-10-1 Methyl Isobutyl Ketone 10 to 20 %
- 108-88-3 Toluene 10 to 20 %
- 14807-96-6 Talc 10 to 20 %
- 67-64-1 Acetone 20 to 30 %

DSL Status: The following chemicals are listed on the DSL Inventory.
- 14808-60-7 Silica, Crystalline 0.1 to 1.0 %
- 100-41-4 Ethylbenzene 0.1 to 1.0 %
- 1333-86-4 Carbon Black 0.1 to 1.0 %
- 67-56-1 Methyl Alcohol 1 to 5 %
- 123-86-4 n-Butyl Acetate 1 to 5 %
- 1330-20-7 Xylene 1 to 5 %
- 67-63-0 Isopropyl Alcohol 1 to 5 %
- 9004-70-0 Nitrocellulose 5 to 10 %
- 108-10-1 Methyl Isobutyl Ketone 10 to 20 %
- 108-88-3 Toluene 10 to 20 %
- 14807-96-6 Talc 10 to 20 %
- 67-64-1 Acetone 20 to 30 %

HAPS: This formulation contains the following HAPS:
- 100-41-4 Ethylbenzene 0.1 to 1.0 %
- 67-56-1 Methyl Alcohol 1 to 5 %
- 1330-20-7 Xylene 1 to 5 %
- 108-10-1 Methyl Isobutyl Ketone 10 to 20 %
- 108-88-3 Toluene 10 to 20 %

NJ RTK: The following chemicals are listed under New Jersey RTK
- 14808-60-7 Silica, Crystalline 0.1 to 1.0 %
100-41-4 Ethylbenzene 0.1 to 1.0 %
1333-86-4 Carbon Black 0.1 to 1.0 %
67-56-1 Methyl Alcohol 1 to 5 %
123-86-4 n-Butyl Acetate 1 to 5 %
1330-20-7 Xylene 1 to 5 %
Maleic modified rosin resin, Proprietary 1 to 5 %
67-63-0 Isopropyl Alcohol 1 to 5 %
9004-70-0 Nitrocellulose 5 to 10 %
108-10-1 Methyl Isobutyl Ketone 10 to 20 %
108-88-3 Toluene 10 to 20 %
14807-96-6 Talc 10 to 20 %
67-64-1 Acetone 20 to 30 %

California Proposition 65
WARNING: This product contains the following chemical(s) known to the State of California to cause birth defects or other reproductive harm.
108-88-3 Toluene 10 to 20 %

California Proposition 65
WARNING: This product contains the following chemical(s) known to the State of California to cause cancer.

PA RTK: The following chemicals are listed under Pennsylvania RTK:
14808-60-7 Silica, Crystalline 0.1 to 1.0 %
100-41-4 Ethylbenzene 0.1 to 1.0 %
1333-86-4 Carbon Black 0.1 to 1.0 %
108-10-1 Methyl Isobutyl Ketone 10 to 20 %
67-63-0 Isopropyl Alcohol 1 to 5 %
9004-70-0 Nitrocellulose 5 to 10 %
108-10-1 Methyl Isobutyl Ketone 10 to 20 %
108-88-3 Toluene 10 to 20 %
14807-96-6 Talc 10 to 20 %
67-64-1 Acetone 20 to 30 %

SARA 312: This Product contains the following chemicals subject to the reporting requirements of SARA 312:
100-41-4 Ethylbenzene 0.1 to 1.0 %
108-10-1 Methyl Isobutyl Ketone 10 to 20 %
108-88-3 Toluene 10 to 20 %

SARA 313: This Product contains the following chemicals subject to the reporting requirements of SARA 313:
100-41-4 Ethylbenzene 0.1 to 1.0 %
67-56-1 Methyl Alcohol 1 to 5 %
108-10-1 Methyl Isobutyl Ketone 10 to 20 %
108-88-3 Toluene 10 to 20 %

WHMIS:
14808-60-7 Silica, Crystalline 0.1 to 1.0 %
100-41-4 Ethylbenzene 0.1 to 1.0 %
1333-86-4 Carbon Black 0.1 to 1.0 %
TSCA: The following are not listed under TSCA:

- None

Section 16 - Other Information

Note: HMIS Ratings involve data and interpretations that can vary from company to company. They are intended only for rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.
