# SAFETY DATA SHEET

## Section 1 - Product and Company Identification

**Product Name:** KICKER Urethane Accelerator  
**Product Code:** 6417, M6417-BK  
**Manufacturer/Supplier:** TRANS TAR AUTOBODY TECHNOLOGIES  
2040 Heiserman Dr.  
Brighton, MI, 48114, USA  
**24 Hour Emergency Phone(s):**  
USA 800-424-9300 (CHEMTREC)  
International 001-703-527-3887 (CHEMTREC Int'l)  
**Canadian Distributor (if applicable):**  
**Business Phone:** 800-824-2843  
**SDS Prepared By:** Transtar Autobody Technologies

**Product Use:** Urethane Accelerator, For professional and industrial use only  
**Not recommended for:** Not for sale to the general public

## Section 2 - Hazards Identification

### Classification of the substance or mixture

#### GHS Ratings:

<table>
<thead>
<tr>
<th>Flammable liquid</th>
<th>3</th>
<th>Flash point &gt;= 23°C and &lt;= 60°C (140°F)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oral Toxity</td>
<td>Acute Tox. 3</td>
<td>Oral&gt;50&lt;=300mg/kg</td>
</tr>
<tr>
<td>Mutagen</td>
<td>2</td>
<td>Suspected/Possible: May include heritable mutations in human germ cells, Positive evidence from tests in mammals and somatic cell tests, In vivo somatic genotoxicity supported by in vitro mutagenicity</td>
</tr>
<tr>
<td>Reproductive toxin</td>
<td>1A</td>
<td>Based on human evidence</td>
</tr>
<tr>
<td>Organ toxin single exposure</td>
<td>3</td>
<td>Transient target organ effects- Narcotic effects- Respiratory tract irritation</td>
</tr>
<tr>
<td>Organ toxin repeated exposure</td>
<td>2</td>
<td>Presumed to be harmful to human health- Animal studies with significant toxic effects relevant to humans at generally moderate exposure (guidance)- Human evidence in exceptional cases</td>
</tr>
</tbody>
</table>

#### GHS Hazards

- H226 Flammable liquid and vapor
- H301 Toxic if swallowed
- H335 May cause respiratory irritation
- H336 May cause drowsiness or dizziness
- H341 Suspected of causing genetic defects
- H360 May damage fertility or the unborn child
- H373 May cause damage to organs through prolonged or repeated exposure

#### GHS Precautions

- **P101** If medical advice is needed, have product container or label at hand
- **P102** Keep out of reach of children
- **P103** Read label before use
- **P201** Obtain special instructions before use
- **P202** Do not handle until all safety precautions have been read and understood
- **P210** Keep away from heat, hot surfaces, sparks, open flames and other ignition sources - No smoking
- **P233** Keep container tightly closed
- **P240** Ground and bond container and receiving equipment
<table>
<thead>
<tr>
<th>P241</th>
<th>Use explosion-proof electrical, ventilating, lighting and motorized equipment</th>

Section 4 - First Aid Measures

INHALATION: If Inhaled: Remove person to fresh air and keep comfortable for breathing. If breathing difficulty persists, seek medical attention.

EYE CONTACT: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for a minimum of 15 minutes while holding eye lids open. If eye irritation persist: seek medical attention.

SKIN CONTACT: Take off all contaminated clothing immediately. Wash exposed area thoroughly with soap and water. Seek medical attention if irritation persists. Do NOT use solvents or thinners to wash off.

INGESTION: If swallowed, seek medical attention immediately and have product container or label at hand. DO NOT INDUCE VOMITING unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed:
Potential acute health effects:
Eye contact: Causes serious eye irritation.
Inhalation: Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Skin contact: Causes skin irritation.
Ingestion: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways. Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms:
Eye contact: Adverse symptoms may include the following:
Pain or irritation, watering, redness
Inhalation: Adverse symptoms may include the following:
Respiratory tract irritation, coughing, nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo, unconsciousness
Skin contact: Adverse symptoms may include the following:
Irritation, redness.
Ingestion: Adverse symptoms may include the following:
Nausea or vomiting.

Indication of any immediate medical attention and special treatment needed:
Seek professional medical attention for all over-exposures and/or persistent problems.
In case of inhalation of decomposition products in a fire, symptoms may be delayed.
The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments: No specific treatment.
Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

Section 5 - Fire Fighting Measures

LEL: 2.4 % UEL: 11.6 %

Extinguishing Media: Dry Chemical, Foam, CO2 or water fog.
Unsuitable Extinguishing Media: High volume water jets

Unusual Fire and Explosion Hazards: Vapors can travel to a source of ignition and flash back. Closed containers may explode when exposed to extreme heat or burst when contaminated with water (CO2 gas evolved). Hazards apply to empty containers. Combustion generates toxic fumes.

Hazardous Combustion Products: oxides of carbon, oxides of nitrogen, formaldehyde, toxic fume

Special Firefighting Procedures: Highly toxic fumes may be generated by thermal decomposition. Water runoff from firefighting can cause environmental damage. Dike and collect water used to fight fire.

Fire Equipment: Full fire fighter equipment including SCBA should be worn to avoid skin contact and inhalation of concentrated vapors. Minimize skin exposure.

### Section 6 - Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures:**
Use personal protective equipment. Avoid breathing vapors and mist. Ensure adequate ventilation. Eliminate all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulation to form explosive concentrations. Vapors can accumulate in low areas.
For personal protection see section 8.

**Environmental precautions:**
Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

**Methods and materials for containment and cleaning up:**

**Small Spills:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large Spills:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

### Section 7 - Handling and Storage

**Safe Handling Measures:** Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Ground and bond container and receiving equipment. Use non-sparking tools and explosion proof equipment when handling this material. Keep away from sources of ignition - No Smoking. Use in cool, well-ventilated areas. Keep containers closed when not in use. Take measures to prevent the build up of electrostatic charge. Follow all SDS and label precautions even after container is emptied because they may retain product residues. For precautions see section 2.

**General Occupational Hygiene:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Storage Requirements:** Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces-No Smoking. Store in a cool, dry and well-ventilated place. Do not reuse container when empty.

### Section 8 - Exposure Control and PPE

<table>
<thead>
<tr>
<th>Chemical Name / CAS No.</th>

<th>ACGIH Exposure Limits</th>
<th>Other Exposure Limits</th>
</tr>
</thead>
</table>

SDS for: 6417, M6417-BK
Printed: 10/6/2015 at 5:42:41PM
### Engineering Controls
Ground and bond container and recieving equipment. Use explosion proof electrical, ventilation, lighting and motorized equipment. Use non-sparking tools. Ensure adequate ventilation.

### Ventilation
General mechanical ventilation or local exhaust should be utilized to keep vapor concentrations below exposure limits (PEL & TLV). Ventilation equipment must be explosion proof.

### Safe Work Practices
Eye washes and safety showers in the workplace are recommended. Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands thoroughly after using and before eating, drinking or smoking.

Employee education and training in the safe use and handling of this product is required under the OSHA Hazard Communication Standard 29CFR1200. Smoking in area where this material is used should be strictly prohibited.

Always use protective clothing and equipment. Remove all contaminated clothing and wash thoroughly when finished working. Keep food and drink away from material and from area where material is being used.

Spraying of material can cause and oxygen deficient environment. Use proper ventilation to remove vapors, mist and fumes combined with NIOSH approved respirator.

### Respiratory Protection
When working with this material use a MSHA/NIOSH approved cartridge respirator or suitable respiratory protection to keep airborne mists and vapor concentrations below the PEL & TLV limits. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus.

### Eye/Face Protection
Use safety glasses with chemical splash goggles or faceshield.

### Skin Protection
Use chemical resistant gloves.

### Body Protection
Impervious clothing, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

### Contaminated Gear/Hygiene Practices
Remove all contaminated clothing and wash thoroughly when finished working. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Keep food and drink away from materials and from area where material is being used or stored.

### Section 9 - Physical and Chemical Properties
This mixture typically exhibits the following properties under normal circumstances:

<table>

Section 10 - Stability and Reactivity

**Reactivity:** No data available

**Stability:** Stable under recommended storage conditions.

**Possibility of hazardous reactions:** Vapors may form explosive mixture with air. Hazardous polymerization will not occur.

**Conditions to avoid:** Heat, flame and sparks. Extreme temperature and direct sunlight.

**Incompatible with:**
- Strong acids
- Strong bases
- Strong oxidizers
- Mineral acids

**Hazardous products produced under decomposition:**
- Carbon Monoxide
- Carbon Dioxide

Section 11 - Toxicological Information

**Mixture Toxicity**
- Oral Toxicity: 55mg/kg
- Inhalation Toxicity: 1,244mg/L

**Component Toxicity**
- 77-58-7 Dibutyltin Dilaurate
  - Oral: 45 mg/kg (Rat)
  - Dermal: 630 mg/kg (Rabbit)

This mixture has not been tested for toxicological effects.

**Acute Effects:**
- **INHALATION** - Dizziness, breathing difficulty, headaches, & loss of coordination.
- **EYE CONTACT** - Moderate irritation, tearing, redness, and blurred vision.
- **SKIN CONTACT** - Moderate irritant. Can dry and defat skin causing cracks, irritation, and dermatitis.
- **INGESTION** - Can cause gastrointestinal irritation, vomiting, nausea, & diarrhea.

**Chronic Effects:**
- May affect liver, kidney and central nervous system with repeated exposure. Prolonged or repeated exposure may cause lung injury.

**Routes of Entry**
- **Inhalation**
- **Skin Contact**
- **Eye Contact**
- **Ingestion**

**Target Organs**
- Eyes
- Lungs
- Central Nervous System
- Skin

**Effects of Overexposure**
Short Term Exposure
Irritates the eyes, skin, and respiratory tract. Eye irritation may be severe. May affect the nervous system. If inhaled, will cause dizziness, coughing, headaches, convulsions, loss of consciousness and possible death. In addition to neuropathy, 2,4-pentanediol causes thymic atrophy; it complexes with and inhibits the activities of oxidizing enzymes; it causes minor to severe eye injury and minor to moderate skin irritation in animals; and it has caused contact urticaria and allergic contact dermatitis in humans.

Long Term Exposure
Repeated or prolonged contact may cause skin sensitization and allergy. High exposure may affect the brain. May affect the lungs, thymus, central nervous system. There is limited evidence of reproductive damage and mutations.

The following chemicals comprise of at least 0.1% of this mixture and are listed and/or classified as carcinogens or potential carcinogens by the NTP, IARC, OSHA (mandatory listing) or ACGIH (optional listing).

<table>

Section 12 - Ecological Information
This material has not been tested for ecological effects.

Persistence and degradability: No data available

Bioaccumulative potential: No data available

Mobility in soil: No data available

Other adverse effects: Contains photochemically reactive solvent.

Component Ecotoxicity
2,4-Pentanediol
96 Hr LC50 Pimephales promelas: 98.3 - 110 mg/L [flow-through]; 96 Hr LC50 Lepomis macrochirus: 50.3 - 71.8 mg/L [flow-through]; 96 Hr LC50 Oncorhynchus mykiss: 64.1 - 80.1 mg/L [flow-through]
48 Hr EC50 Daphnia magna: 34.4 mg/L

Section 13 - Disposal Considerations
Product and container should be disposed of in accordance with all local, regional, national and international regulations. Contact a licensed professional waste disposal service to dispose of this material. Subject to hazardous waste generation, treatment, storage and disposal rules under RCRA, 40CFR261.

Section 14 - Transportation Information
The following transportation information is provided based on Transtar Autobody Technologies interpretation of shipping regulations. Each shipper is responsible for identifying, naming, marking and labeling prior to offering for transport.

Section 15 - Regulatory Information
The information listed in this section is not all inclusive of all regulations for this product or the chemical components.
of this product.

**Australia-AICS:** The following chemicals are listed:
- 77-58-7  Dibutyltin Dilaurate  1 to 5 %
- 123-54-6  2,4-Pentanediione  90 to 100 %

**California Hazardous Substance List:**
- None

**China-SEPA (IECSC):** The following chemicals are listed:
- 77-58-7  Dibutyltin Dilaurate  1 to 5 %
- 123-54-6  2,4-Pentanediione  90 to 100 %

**DSL Status:** The following chemicals are listed on the DSL Inventory.
- 77-58-7  Dibutyltin Dilaurate  1 to 5 %
- 123-54-6  2,4-Pentanediione  90 to 100 %

**HAPS:** This formulation contains the following HAPS:
- None

**NJ RTK:** The following chemicals are listed under New Jersey RTK
- 123-54-6  2,4-Pentanediione  90 to 100 %

**California Proposition 65**
WARNING: This product contains the following chemical(s) known to the State of California to cause birth defects or other reproductive harm.
- 77-58-7  Dibutyltin Dilaurate  1 to 5 %

**California Proposition 65**
WARNING: This product contains the following chemical(s) known to the State of California to cause cancer.
- None

**PA RTK:** The following chemicals are listed under Pennsylvania RTK:
- 123-54-6  2,4-Pentanediione  90 to 100 %

**EU REACH SIN:** The chemicals listed below are on the EU REACH SIN list
- 77-58-7  1 to 5 %

**SARA 312:** This Product contains the following chemicals subject to the reporting requirements of SARA 312:
- None

**SARA 313:** This Product contains the following chemicals subject to the reporting requirements of SARA 313:
- None

**WHMIS:**
- 77-58-7  Dibutyltin Dilaurate  1 to 5 %
- 123-54-6  2,4-Pentanediione  90 to 100 %

**TSCA:** The following are not listed under TSCA:
- None
Note: HMIS Ratings involve data and interpretations that can vary from company to company. They are intended only for rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.
