Section 1 - Product and Company Identification

Product Name: FLASH CLEARCOAT  
Manufacturer/Supplier: TRANSTAR AUTOBODY TECHNOLOGIES  
2040 Heiserman Dr.  
Brighton, MI, 48114, USA  
Product Code: OR3001

24 Hour Emergency Phone(s):  
USA & Canada 800-424-9300 (CHEMTREC)  
International +1-703-741-5970 (CHEMTREC Int'l)  
Business Phone: 810-360-1600  
SDS Prepared By: Transtar Autobody Technologies

Product Use: Automotive Paint. For Industrial and Professional Use Only.  
Not recommended for: Not for sale to the general public.

Section 2 - Hazards Identification

Classification of the substance or mixture

GHS Ratings:

- **Flammable liquid**: 2  (Flash point < 23°C and initial boiling point > 35°C (95°F))
- **Skin corrosive**: 2  (Reversible adverse effects in dermal tissue, Draize score: >= 2.3 < 4.0 or persistent inflammation)
- **Eye corrosive**: 2A  (Eye irritant: Subcategory 2A, Reversible in 21 days)
- **Reproductive toxin**: 1B  (Known or presumed to cause effects on human reproduction or on development)
- **Organ toxin single exposure**: 3  (Transient target organ effects- Narcotic effects- Respiratory tract irritation)
- **Organ toxin repeated exposure**: 2  (Presumed to be harmful to human health- Animal studies with significant toxic effects relevant to humans at generally moderate exposure (guidance)- Human evidence in exceptional cases)
- **Aquatic toxicity**: A3  (Acute toxicity <= 10.0 but < 100 mg/l)

GHS Hazards

- **H225**: Highly flammable liquid and vapor  
- **H315**: Causes skin irritation  
- **H319**: Causes serious eye irritation  
- **H336**: May cause drowsiness or dizziness  
- **H360**: May damage fertility or the unborn child  
- **H373**: May cause damage to organs through prolonged or repeated exposure  
- **H402**: Harmful to aquatic life

GHS Precautions

- **P101**: If medical advice is needed, have product container or label at hand  
- **P102**: Keep out of reach of children  
- **P103**: Read label before use  
- **P201**: Obtain special instructions before use  
- **P202**: Do not handle until all safety precautions have been read and understood  
- **P210**: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources - No smoking  
- **P233**: Keep container tightly closed  
- **P240**: Ground and bond container and receiving equipment

### Section 4 - First Aid Measures

**INHALATION:** If Inhaled: Remove person to fresh air and keep comfortable for breathing. If breathing difficulty persists, seek medical attention.

**EYE CONTACT:** Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for a minimum of 15 minutes while holding eye lids open. If eye irritation persist: seek medical attention.

**SKIN CONTACT:** Take off all contaminated clothing immediately. Wash exposed area thoroughly with soap and water. Seek medical attention if irritation presists. Do NOT use solvents or thinners to wash off.

**INGESTION:** If swallowed, seek medical attention immediately and have product container or label at hand. DO NOT INDUCE VOMITING unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.

**Most important symptoms and effects, both acute and delayed:**
Dizziness, breathing difficulty, headaches, & loss of coordination.

**Indication of any immediate medical attention and special treatment needed.**
Seek professional medical attention for all over-exposures and/or persistent problems.

### Section 5 - Fire Fighting Measures

**LEL:** 0.9 %  
**UEL:** 12.8 %

**Extinguishing Media:** Dry Chemical, Foam, CO2 or water fog.

**Unsuitable Extinguishing Media:** High volume water jets

**Unusual Fire and Explosion Hazards:** Vapors can travel to a source of ignition and flash back. Closed containers
may explode when exposed to extreme heat or burst when contaminated with water (CO2 gas evolved). Hazards apply to empty containers. Combustion generates toxic fumes.

**Hazardous Combustion Products:** oxides of carbon, oxides of nitrogen, formaldehyde, toxic fumes

**Special Firefighting Procedures:** Highly toxic fumes may be generated by thermal decomposition. Water runoff from firefighting can cause environmental damage. Dike and collect water used to fight fire.

**Fire Equipment:** Full fire fighter equipment including SCBA should be worn to avoid skin contact and inhalation of concentrated vapors. Minimize skin exposure.

---

**Section 6 - Accidental Release Measures**

**Personal precautions, protective equipment and emergency procedures:**
Use personal protective equipment. Avoid breathing vapors and mist. Ensure adequate ventilation. Eliminate all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulation to form explosive concentrations. Vapors can accumulate in low areas.

For personal protection see section 8.

**Environmental precautions:**
Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

**Methods and materials for containment and cleaning up:**
Dike spill area and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth. Sweep up and dispose of in appropriate containers in accordance to Federal, State and/or Local regulations. Clean preferably with a detergent; avoid use of solvents.

---

**Section 7 - Handling and Storage**

**Safe Handling Measures:** Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Ground and bond container and receiving equipment. Use non-sparking tools and explosion proof equipment when handling this material. Keep away from sources of ignition - No Smoking. Use in cool, well-ventilated areas. Keep containers closed when not in use. Take measures to prevent the build up of electrostatic charge. Follow all SDS and label precautions even after container is emptied because they may retain product residues. For precautions see section 2.

**Storage Requirements:** Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces- No Smoking. Store in a cool, dry and well-ventilated place. Do not reuse container when empty.

---

**Section 8 - Exposure Control and PPE**

</table>
**Engineering Controls:** Ground and bond container and receiving equipment. Use explosion proof electrical, ventilation, lighting and motorized equipment. Use non-sparking tools. Ensure adequate ventilation.

**Ventilation:** General mechanical ventilation or local exhaust should be utilized to keep vapor concentrations below exposure limits (PEL & TLV). Ventilation equipment must be explosion proof.

**Safe Work Practices:** Eye washes and safety showers in the workplace are recommended. Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands thoroughly after using and before eating, drinking or smoking. Employee education and training in the safe use and handling of this product is required under the OSHA Hazard Communication Standard 29CFR1200. Smoking in an area where this material is used should be strictly prohibited. Always use protective clothing and equipment. Remove all contaminated clothing and wash thoroughly when finished working. Keep food and drink away from material and from areas where material is being used. Spraying of material can cause and oxygen deficient environment. Use proper ventilation to remove vapors, mist and fumes combined with NIOSH approved respirator.

**Respiratory Protection:** When working with this material use a MSHA/NIOSH approved cartridge respirator or suitable respiratory protection to keep airborne mists and vapor concentrations below the PEL & TLV limits. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus.

**Eye/face Protection:** Use safety glasses with chemical splash goggles or faceshield.

**Skin Protection:** Use chemical resistant gloves.

**Body Protection:** Impervious clothing, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

**Contaminated Gear:** Take off contaminated clothing immediately and wash before reuse.

Section 10 - Stability and Reactivity

Reactivity: No data available

Stability: Stable under recommended storage conditions.

Possibility of hazardous reactions: Vapors may form explosive mixture with air. Hazardous polymerization will not occur.

Conditions to avoid: Heat, flame and sparks. Extreme temperature and direct sunlight.

Incompatible with:
- Strong oxidizers
- Strong oxidizing agents
- Strong bases

Hazardous products produced under decomposition:

Carbon monoxide, carbon dioxide, oxides of nitrogen, and cyanide.

Section 11 - Toxicological Information

Mixture Toxicity
Inhalation Toxicity: 53mg/L

Component Toxicity
- 98-56-6 Chlorobenzotrifluoride
  - Oral: 13 g/kg (Rat)  Dermal: 3 g/kg (Rabbit)  Inhalation: 33 mg/L (Rat)

- 110-43-0 Methyl n-Amyl Ketone
  - Oral: 1,600 mg/kg (Rat)  Inhalation: 17 mg/L (Rat)

This mixture has not been tested for toxicological effects.

Acute Effects:
- INHALATION - Dizziness, breathing difficulty, headaches, & loss of coordination.
- EYE CONTACT - Moderate irritation, tearing, redness, and blurred vision.
- SKIN CONTACT - Moderate irritant. Can dry and defat skin causing cracks, irritation, and dermatitis.
- INGESTION - Can cause gastrointestinal irritation, vomiting, nausea, & diarrhea.

Chronic Effects:
May affect liver, kidney and central nervous system with repeated exposure. Prolonged or repeated exposure may cause lung injury.

Routes of Entry
- Inhalation
- Skin Contact
- Eye Contact
- Ingestion

Target Organs
- Eyes
- Kidneys
- Liver
- Central Nervous System
- Skin
- Peripheral Nervous System
- Respiratory System

Effects of Overexposure

Short Term Exposure
Contact can irritate the skin. Exposure can irritate the eyes and respiratory tract.
Exposure to high concentrations can cause dizziness, lightheadedness, and unconsciousness. Causes local irritation to skin, eyes and mucous membranes. May cause irritation by any route of exposure. The LD50 rat is 13 gm/kg (13,000 mg/kg) (insignificantly toxic). Methyl n-amyl ketone can affect you when breathed in and by passing through your skin. Irritates the eyes and the respiratory tract. May affect the central nervous system. Breathing the vapor can cause dizziness and lightheadedness, and can make you pass out.
Long Term Exposure

Repeated skin exposure can cause dryness and skin cracking. This chemical has not been adequately evaluated to determine whether brain or nerve damage could occur with repeated exposure. However, many solvents and other petroleum-based chemicals have been shown to cause such damage. Effects may include reduced memory and concentration, personality changes (withdrawal, irritability), and fatigue, sleep disturbances, reduced coordination, and/or effects on the nerves to the arms and legs (weakness, "pins and needles"). There is evidence that this chemical is a mutagen. Causes skin irritation with cracking and drying; destroys the skin's natural oils. May cause liver and kidney damage. May affect the nervous system.

The following chemicals comprise of at least 0.1% of this mixture and are listed and/or classified as carcinogens or potential carcinogens by the NTP, IARC, OSHA (mandatory listing) or ACGIH (optional listing).

Section 12 - Ecological Information

This material has not been tested for ecological effects.

Persistency and degradability: No data available

Bioaccumulative potential: No data available

Mobility in soil: No data available

Other adverse effects: Contains photochemically reactive solvent.

Component Ecotoxicity

Chlorobenzotrifluoride

48 Hr EC50 Daphnia magna: 3.68 mg/L

Acetone

96 Hr LC50 Oncorhynchus mykiss: 4.74 - 6.33 mL/L; 96 Hr LC50 Pimephales promelas: 6210 - 8120 mg/L [static]; 96 Hr LC50 Lepomis macrochirus: 8300 mg/L

48 Hr EC50 Daphnia magna: 10294 - 17704 mg/L [Static]; 48 Hr EC50 Daphnia magna: 12600 - 12700 mg/L

Methyl n-Amyl Ketone

96 Hr LC50 Pimephales promelas: 126 - 137 mg/L [flow-through]

Section 13 - Disposal Considerations

Product should be disposed of in accordance with all Federal, State and local regulations. Contact a licensed professional waste disposal service to dispose of this material. Subject to hazardous waste generation, treatment, storage and disposal rules under RCRA, 40CFR261.

Section 14 - Transportation Information

The following transportation information is provided based on Transtar Autobody Technologies interpretation of shipping regulations. Each shipper is responsible for identifying, naming, marking and labeling prior to offering for transport.

Section 15 - Regulatory Information

The information listed in this section is not all inclusive of all regulations for this product or the chemical components of this product.

**California Hazardous Substance List:**
- None

**HAPS:** This formulation contains the following HAPS:
- None

**NJ RTK:** The following chemicals are listed under New Jersey RTK:
110-43-0  Methyl n-Amyl Ketone  1 to 5 %
67-64-1  Acetone  10 to 20 %

**California Proposition 65**
WARNING: This product contains the following chemical(s) known to the State of California to cause birth defects or other reproductive harm.
100-42-5  Styrene  239 PPM

**California Proposition 65**
WARNING: This product contains the following chemical(s) known to the State of California to cause cancer.
- None

**PA RTK:** The following chemicals are listed under Pennsylvania RTK:
110-43-0  Methyl n-Amyl Ketone  1 to 5 %
67-64-1  Acetone  10 to 20 %

**EU REACH SIN:** The chemicals listed below are on the EU REACH SIN list
77-58-7  0.1 to 1.0 %

**SARA 312:** This Product contains the following chemicals subject to the reporting requirements of SARA 312:
- None

**SARA 313:** This Product contains the following chemicals subject to the reporting requirements of SARA 313:
100-42-5  Styrene  239 PPM

**WHMIS:**
110-43-0  Methyl n-Amyl Ketone  1 to 5 %
67-64-1  Acetone  10 to 20 %

**TSCA:** The following are not listed under TSCA:

None

Section 16 - Other Information
Note: HMIS Ratings involve data and interpretations that can vary from company to company. They are intended only for rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.
